Summary

Industrial Engineering & Management student (Data Science specialization) at Braude College. Full-stack development, Python automation, APIs, version control, process improvement, linking software, data, and business operations.

Professional Experience

Student Part-time Position

IACS | Remote

March 2025 - Present

- Spearheading migration of 5 business-critical auditing tools from VBA to Python.
- Developing Python scripts for data ETL and analysis, leveraging NumPy vectorization to achieve over 99% reduction in compute time (15 minutes to seconds).
- Designing and maintaining GitHub source code, version control, and GitHub workflows.

Corporate Planning Coordinator

Tower Semiconductor | Migdal Haemek

August 2025 - November 2025

- Driven the optimization of corporate forecasting processes and maintained data integrity.
- Managed data cleansing, analysis, and report generation for the Corporate Planning department.
- Coordinated between worldwide sales teams and Corporate Planning to address business system issues.

Student Part-time Position

Wiesman Fridman | Dshanin, Kriyat Ata

December 2024 - July 2025

- Executed a project focused on measuring set-up times and identifying issues with prolonged set-up durations.
- Participated in a pilot program for integrating an ERP ticket downtime system for the production floor.

Projects

Full Stack Developer

Automated Tournament Insights System

- MERN application serving 250 local users with automated match scheduling and real-time data processing.
- Integrated AI-driven matchmaking and automated match summaries to replace manual administration.
- Advanced Unicode-aware text processing and Hebrew RTL support for complex localized datasets.
- Native Node.js services for backend automation and high-concurrency event handling.

Backend Developer

Community File-Sharing Web App

- Flask REST API backend serving an Angular frontend for 150 students.
- Session-based auth, RBAC, and input validation to prevent unauthorized access.
- Custom CSV-based repositories for managing user data and file metadata.

Education

B.Sc. Industrial Engineering and Management - Braude College, Karmiel

2023 - Present

Relevant Coursework:

- Data Structures & Algorithms, Advanced Python Programming (OOP), Information Systems Analysis & Design, Planning and Operating Supply Process, Time and Motion Study, Deep Learning, SQL

Skills

Programming: TypeScript, Node.js, React, Python, SQL | **Software & Data:** MongoDB, Power BI, GitHub, MS Excel

Languages

Hebrew: Native | **English:** High Proficiency | **Arabic:** Medium Proficiency
